SUMMARY

Software Engineering leader with 7+ years at JP Morgan Chase building consumer payment platforms serving ~1 million daily users. Proven track record owning full product lifecycles across planning, delivery, and post-release support, with deep expertise in React, TypeScript, and accessibility-first engineering.

WORK EXPERIENCE

JP Morgan Chase

New York City, NY

Vice President of Software Engineering

Feb 2023 – Present

- Pioneered an **AI-driven SDLC workflow** using GitHub Copilot paired with a structured knowledge-base (Obsidian), automating JIRA requirements intake, PRD generation, task decomposition, and code delivery — significantly reducing cycle time from requirements to production.
- Achieved comprehensive **test automation coverage** by leveraging AI-assisted generation of unit, component, and E2E test suites, improving regression confidence and reducing QA bottlenecks.
- Built internal CLI tools for **production CDN artifact publishing** and **feature flag management**, eliminating manual release steps and enabling self-service deployments for the team.
- Led development of **Payment Activity** and **Transfer Activity** components, delivering high-visibility features across the consumer banking platform.
- Served as **project coordinator** — drove end-to-end planning, sprint execution, stakeholder alignment, and post-release support.
- Established engineering best practices and mentored associate engineers, raising code quality and team delivery velocity.

JP Morgan Chase

New York City, NY

Associate Software Engineer

Mar 2019 – Feb 2023

- Engineered and maintained **SingleDoor**, a unified payment platform consolidating BillPay, QuickPay with Zelle, and Credit Card payments, supporting ~1 million daily active users.
- Transformed design wireframes into modular, reusable UI components using BlueJS, improving development velocity across teams.
- Built an internal **Chrome extension** to verify CDN artifact publication, streamlining release validation workflows for developers.
- Integrated analytics tracking and resolved ADA accessibility issues to achieve full WCAG compliance across the SingleDoor platform.

Charter Communications

Charlotte, NC

Full Stack Software Developer

May 2018 – Feb 2019

- Modernized legacy systems by migrating UI components to AngularJS, improving maintainability and reducing technical debt.
- Designed and implemented RESTful APIs using TypeScript and Node.js to support feature development across multiple internal products.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Bash

Frameworks & Libraries: React, AngularJS, Vue.js, Node.js, Bootstrap, Sass, WebSocket

Tools & Practices: Git, Webpack, REST APIs, AWS, JIRA, Jest, CI/CD, Agile/Scrum, WCAG/ADA

CERTIFICATIONS

AWS Certified Cloud Practitioner

Sep 2023

AWS Web Services, Cloud Computing, Cloud Platforms

EDUCATION

North South University

Dhaka, Bangladesh

Bachelor of Science in Computer Science and Engineering
