

Ali Abdullah Khan

Software Engineering Leader | React & TypeScript | Consumer Payment Platforms

929-444-2248 | abdullah017196@gmail.com | linkedin.com/in/abdullah017196 | github.com/hellsalve017196 | alikhan.dev | Holbrook, New York, USA | U.S. Citizen – No sponsorship required

PROFESSIONAL SUMMARY

Software engineering leader with 7+ years of experience delivering high-scale consumer banking and payment products, including platforms serving approximately 1 million daily users. Leads full product lifecycles from planning and architecture through agile delivery, release readiness, and production support. Deep expertise in React, TypeScript, JavaScript, reusable UI architecture, analytics, and WCAG/ADA accessibility, with a record of mentoring engineers and improving engineering practices.

CORE COMPETENCIES

Engineering Leadership | Front-End Architecture | React | TypeScript | JavaScript (ES6+) | Node.js | Consumer Payments | REST APIs | Accessibility (WCAG/ADA) | Agile/Scrum | Agentic-Driven Development | Stakeholder Management | CI/CD | Testing | Mentoring

PROFESSIONAL EXPERIENCE

JPMorgan Chase & Co.

New York, NY

Lead Software Engineer

Feb 2023 – Present

- Lead development of Payment Activity and Transfer Activity experiences across the consumer banking platform, delivering high-visibility payment capabilities for a large-scale customer base.
- Own end-to-end execution across roadmap planning, sprint delivery, cross-functional stakeholder alignment, release coordination, and post-production support.
- Establish front-end engineering standards and mentor associate engineers, strengthening code quality, maintainability, accessibility, and delivery consistency.
- Partner with product, design, analytics, and engineering stakeholders to translate customer and business requirements into scalable, reusable software solutions.
- Drive an AI-assisted software development lifecycle using GitHub Copilot and a structured knowledge base, automating requirements intake, PRD generation, task decomposition, and code delivery to reduce cycle time from requirements to production.
- Expand automated test coverage across unit, component, and end-to-end suites through AI-assisted test generation, improving regression confidence and reducing QA bottlenecks.
- Build internal CLI tooling for production CDN artifact publishing and feature flag management, eliminating manual release steps and enabling self-service deployments.

JPMorgan Chase & Co.

New York, NY

Associate Software Engineer

Mar 2019 – Feb 2023

- Engineered and maintained SingleDoor, a unified payment platform integrating Bill Pay, QuickPay with Zelle, and credit card payment workflows for approximately 1 million daily users.
- Converted design wireframes into modular, reusable UI components using BlueJS, improving consistency and accelerating feature development across engineering teams.
- Built an internal Chrome extension that verified CDN artifact publication, simplifying release validation and reducing manual checks for developers.
- Implemented analytics instrumentation and remediated accessibility defects, enabling WCAG/ADA-compliant customer experiences across the SingleDoor platform.
- Supported production releases and issue resolution in a highly regulated financial-services environment, collaborating across product and technology teams.

Charter Communications

Charlotte, NC

Full Stack Software Developer

May 2018 – Feb 2019

- Modernized legacy applications by migrating user-interface components to AngularJS, improving maintainability and reducing technical debt.
- Designed and implemented RESTful APIs with TypeScript and Node.js to support feature delivery across multiple internal products.
- Collaborated with cross-functional teams throughout design, development, testing, and deployment in an Agile delivery environment.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Bash

Frameworks & Libraries: React, AngularJS, Vue.js, Node.js, Bootstrap, Sass, Websocket, BlueJS

Cloud, Tools & Practices: AWS, Git, Webpack, REST APIs, JIRA, Jest, CI/CD, Agile/Scrum, WCAG, ADA, analytics instrumentation

CERTIFICATION

AWS Certified Cloud Practitioner

Sep 2023

Amazon Web Services

EDUCATION

North South University

Dhaka, Bangladesh

Bachelor of Science in Computer Science and Engineering
